

ACHIEVEMENTS

- Spearheaded the development of key social and messaging features for VibeWith, now supporting thousands of active users.
- Migrated a legacy desktop application to a secure, cloud-based portal, enabling real-time access to financial and CRM data, improving efficiency and reducing manual errors.

PROJECTS

Qliqsee

qliqsee.dev

Qliqsee is a unique, sci-fi-themed portfolio web app that merges futuristic design with a warm, wooden brown aesthetic.

Rana

rana.ng

Rana is a peer-to-peer platform that helps connect employers with service providers.

TECHNOLOGIES

- Typescript, C#
- React.js, Next.js, Svelte, Angular

SUMMARY

Software Engineer with 5+ years of experience building web applications and UI tools across industries like education, real estate, e-commerce, and social networking. Focused on clean, modular, and scalable code, I prioritize maintainability and future-proof solutions while staying up to date with the latest technologies.

WORK EXPERIENCE

Swiftcore Technologies

2022 - PRESENT

Lead Frontend Engineer

- Led a cross-functional team to design and implement engaging features such as icebreaker games, trivia, and social event listings that enhance user interaction and engagement on the VibeWith platform.
- Created dynamic group environments, like "Spaces," that allowed users to interact, post content, and engage in discussions, fostering a thriving community.
- Engineered offline support and push notifications, ensuring continuous user engagement even during connectivity interruptions, enhancing the app's usability and retention.

Swiftcore Technologies

2021 - 2022

Senior Frontend Engineer

- Migrated a desktop-based application to a secure, intuitive online portal, enabling real-time, remote access to financial and CRM data for administrators.
- Built customizable reporting tools for administrators to track financial metrics, account balances, and transaction histories, improving oversight and auditing.
- Developed an automated tax-compliant receipt generation system, allowing customizable templates and instant receipt creation, reducing manual errors and boosting efficiency.

Freelance

2020 - 2021

Fullstack Engineer

- Designed and implemented robust cart functionality for an e-commerce.
- Developed a feature that enabled vendors to send product listings directly to customers via WhatsApp. This integration allowed vendors to share their products easily through social media and messaging platforms, significantly enhancing product visibility and customer engagement.
- Employed modern design principles to create a visually appealing and intuitive shopping environment.
